SUMMARY

I am a professional Software Engineer who has spent the last two years employed as a .Net developer, working primarily with the MVC framework. During this time I have worked within a large organization and a small start-up, and have cultivated a record of meeting client expectations and designing elegant solutions to complex problems. View my personal website at jsall.me.

WORK HISTORY

JANUARY 2015-CURRENT
Software Engineer Dietz Consulting |

- Provided consulting services to a diverse range of clients while using the MVC framework to build complex web applications.
- Gained exposure to WebForms, and WPF.
- Contributed well written code that demonstrated good programming practices and an understanding of computational theory.
- Maintained complex relational databases with non-trivial business models
- Designed/maintained high performance stored procedures.
- Experience working with datasets with tens of millions of rows.
- Took responsibility for managing IT infrastructure such as: maintaining GitHub repositories, overseeing staged deployment, and configuring applications hosted through Microsoft Azure.

MAY 2014-MARCH 2015
Intern Developer Florida Department of State |

- Learned the .Net MVC framework, and gained experience performing the basic duties of a software engineer in a large organization.
- Would schedule and lead meetings with users to establish use cases, and with senior staff to discuss feasibility analysis and project deadlines.
